BEAUTIFUL BATHROOM SURFACES

Design in the bathroom has become a key focal point in the home, with a strong desire to create a personalised style. Due to this, the Nuance Bathroom Collection has now expanded their range of surface designs to offer a full choice of finishes to fit the look of any bathroom.

The new collection of Nuance Bathroom Surfaces incorporates stone, granite and wood grain effects, with a range of tones from the cool of Alabaster, Grey Stone and Artic, through to the rich, warm designs encapsulated in Bronze Alaska and Terracotta Granite.

Products are available on a national basis from Nuance specialist decorative distributors. Call us on **01933 232242** for further information.

WORKTOPS

8041 GREYSTONE

With so many naturally inspired finishes, the use of a new half round edge detail maintains the simplicity of the collection.

Size options of 360mm and the new 600mm width now provide the perfect platform for all styles of basin, from Semi-recess, inset counter top to the recent fashion for top mounted basins.

The access covers have been upgraded in specification. Manufactured utilising homogenous compact style laminate with a self colour solid black edge, they have been increased by 40% in size to provide far easier access.
